Tread Designs

THE NEW YORKER (135/141)

The New Yorker (135/141) offers the open-air grace of a cantilever spiral stair with its floating suspended appearance which adds distinction to the design.

Spiral Stair Design 135

Spiral Stair Design 135CW

Available as seen above with checker plate webbing.

Wood covering is skillfully machined and sanded smooth prior to shipment. All wood coatings and finishes applied in field by others. Duvinage can supply Cedar, Teak, Trex® Walnut, Mahogany, Hickory, Birch, Ash, Douglas fir, Brazilian Cherry, White Oak, Cherry, Maple and other fine hardwoods. See wood sample chart.

Note: Standard Wood is ¾" Red Oak

THE MEMPHIS (165)

The Memphis (165) features 3/16" steel plate formed down on front and back of each tread and platform. The underside features a tapered steel channel support beam with plywood inserts flush with the flanges. Carpet wraps around the steel plate and tucks in on each side of tapered beam. For best results install carpet with neoprene cement. Solid birch trim extends 3/8" around steel end plate and provides the finishing touch. Wood trims are available in other wood species. See wood sample chart.

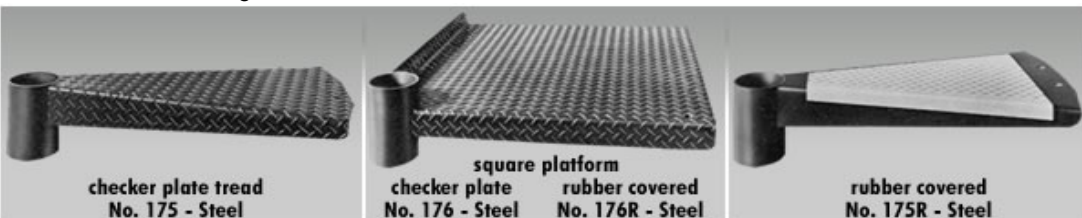

THE BALTIMORE (175)

This all purpose spiral stair is our entry price point to the Duvinage custom stair line.

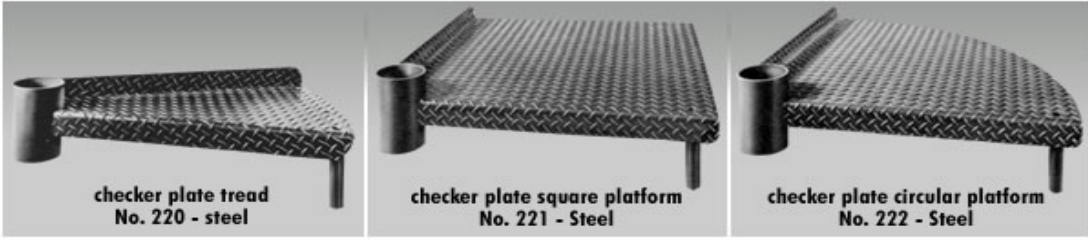

Treads and platforms are made from 3/16" steel plate.

Rubber covered tread option is made with 3/16" plain steel plate and furnished with ¼" marbled rubber covering.

THE BOSTON (220)

The Boston (220) design is of sturdy construction. The clean lines make it an attractive versatile product. Treads and platform are flanged up for maximum headroom. Legs are welded to the treads and platforms for additional rigidity.

THE SAN ANTONIO (201)

The San Antonio (201) Design is of sturdy construction and the clean lines make an attractive installation. Legs are welded to treads and platforms for additional rigidity.
